

RESOLUTION 22.6 TPA House of Delegates

Limits to Chain Pharmacies

WHEREAS, the future of the profession of pharmacy is dependent on chain pharmacies eliminating quotas/metrics that do not promote patient safety; and,

WHEREAS, chains enforcing quotas/metrics lead to insufficient consultation and increased stress to hit targets; and,

WHEREAS, chains enforcing quotas/metrics for financial gain must be eliminated, as they only encourage errors (time limits to verify a prescription); and,

WHEREAS, our precedes is Senate Bill 362 which amends California Business and Professions Code Section 4317 thus prohibiting chain pharmacies from enforcing quotas; and,

WHEREAS, failure to address the issue which concern my profession most certainly will result in diminishing patient safety and impending patient harm; and,

WHEREAS, the most direct access available to me for significant airing of my concerns about the practice of pharmacy is through the resolution procedure in place for the Tennessee Pharmacists Association;

NOW, THEREFORE BE IT RESOLVED, I take the initiative and submit for consideration a resolution which addresses a specific issue about which I have a concern; and,

BE IT FURTHER RESOLVED, this resolution be submitted in a timely fashion and in the requested format for consideration by the Resolutions Committee and the House of Delegates
